

Fresher

Company	Coriolis Technologies Pvt Ltd.
Role	Software Engineer
Location	Pune
Experience	Fresher

Job Description

Coriolis Technologies has openings for fresher candidates for the Software Engineer position. Interested candidates having Bachelor's degree in information technology, Computer Science or equivalent and are Freshers or have under 2 years of experience in software engineering field can apply.

Skills and Abilities

- Good programming and logical skills in any language such as C, C++, Java, python, Angular, React etc.
- Understanding of Object-Oriented concepts, data structures, algorithms and operating systems.
- Good troubleshooting and debugging skills.
- Good Linux/UNIX skills.
- Passion for solid software engineering practices.
- Should be self-driven.
- Excellent communications skills, both verbal and written (English).
- Willingness to proactively interact with the team to achieve results.
- Strong team player.
- Ability to think out of the box and to work with minimal direction.
- Ready to learn new technologies quickly and use them in real-world situations.

What You Get

- Full stack product development exposure
- Working on state-of-the art technology stacks
- Enriching experience of working closely with seasoned experts from the industry
- Techno-professional development much beyond the regular work assignments through research, hackathons and other tech-initiatives
- International work culture while working closer to home

About Us

Coriolis Technologies has been transforming ideas to products for our global customers since 2005. We work with early-stage startups to rapidly prototype, elaborate and productize their core ideas.

We don't offer just an instruction-driven offshore engineering team but our customers find a technology partner in us. Our services span the entire concept-to-completion product development life cycle.

We take pride in being a flat organization with a very open culture. We understand and encourage the urge to explore.
