

Job Description

As a Software Engineer at SquareBoat, you need to have:

- Basic working knowledge of PHP, MySQL, HTML/CSS, Javascript
- Basic understanding of how the Internet works (DNS, browsers, web-servers) etc.

Work Details

- Write high quality backend and frontend code on cutting-edge technology stacks including Laravel, Nodejs, Python, React, Angular, MySQL, MongoDB, Firebase, Elastic Search, Docker, AWS etc. for our clients
- Build cutting edge, large scale web projects
- Manage software projects using tools like JIRA, Trello, Slack and others
- Collaborate with a team of smart and passionate developers
- Contribute to some of our Squareboat Open Source projects
- Work on our Labs projects including Hackr.io, Spectrum, Navigator and more!

You need to have:

- Understanding of at least one backend technology: PHP/Laravel, Node.js/Express/Nest, Python/Django etc.
- Understanding of at least one frontend technology: React, Angular, Vue.js etc.
- Knowledge of MySQL, MongoDB, Firebase, Elastic Search, Docker, AWS etc. is a big plus
- Some interesting side projects you have done or a Github profile with real open source contributions will be a HUGE plus
- A good understanding of the software development lifecycle
- In-depth expertise on web/client-server architectures is a plus
- Strong logic and problem solving skills and ability to troubleshoot applications & environment issues
- Adaptability, ability to learn faster, Independent, responsible and diligent
- Bachelor's degree in Computer Science, Computer Engineering or a related technical discipline
- Strong communication skills

Benefits

- Working with the latest web technologies in an early-stage product startup, with plenty of opportunities to learn
- You will work directly under the mentorship of other senior designers/developers and the startup's founders

Skills

- Laravel, Nodejs, Python, React, Angular, MySQL, MongoDB, Firebase, Elastic Search, Docker, AWS etc

Perks:

- Macbook - The world's best laptops + 22 inch LED Monitors for everyone
