

## **BUSINESS ANALYST ROLE @NEENOPAL**

Read on to find out if you are a fit !!

**\*Only 2021 & 2022 Bachelor Graduates should Apply**

### **Job Description**

NeenOpal is looking for exceptional talent to join our rapidly growing global team. People are our biggest perk! Our transparent and collaborative culture offers a chance to work with some of the brightest minds in the industry. If you are someone who thrives on ambiguity, is a problem solver, and yet deliver value to clients, please apply for the position

### **Position Description**

As a Business Analyst, you will work with our Senior Associate Consultants and be a part of the project delivery teams while being responsible for various facets of the projects - which could entail (but not limited to) Consulting, Business Intelligence (Tableau/PowerBI), Playbook development, research and knowledge building capabilities. You will be accountable for defined work assignments, completing all tasks to meet the team's expectations/standards. You will be required to identify appropriate resources and deliver quality impact while keeping senior team members informed of developments and progress on the assigned tasks.

Some elements of the role and responsibility include:

- Identifying trends and insights via data analysis
- Developing Business Intelligence Dashboards (In various tools like Tableau/PowerBI, etc)
- Understand the client's business by closely working with client counterparts, collaborating with client teams and peers for better outcomes, influencing thinking, and challenging the status quo
- Clearly conceptualize and articulate thoughts, while logically presenting a point of view
- Flex and work collaboratively with people in the team who have a diverse range of skills, styles, and approaches and identify opportunities to increasingly contribute to the team
- Undertake professional qualification; take ownership and responsibility for self-development.

We are looking **ONLY FOR SELF DRIVEN INDIVIDUALS** with a desire to excel in Management Consulting and Analytics Domain. You are expected to learn fast and deliver quickly in a fast-paced startup environment.

### **Required Skills**

This role is open to candidates from all degrees and backgrounds, we expect the candidate to demonstrate consistent success in their analytic and quantitative courses during their college and showcase broadly applicable consulting skills such as:

- Strong work ethic and personal initiative
- Ability to work across global cross-office teams and in a team environment
- Excellent organizational and task management skills
- Structured problem-solving skills
- Focus on quality and detail orientation
- Strong verbal and written communication skills with the ability to articulate results and issues to internal and client teams
- Process management, improvement focus, and willingness to learn cutting edge tool and technology
- Client service orientation and strong business acumen

- Reliable self-starter that is capable of working with a high degree of autonomy

## Benefits
