

Role: Fresher QA Engineer

Devtron was established in 2019 by industry veterans with more than 30 years of experience under their belt. With some of the most technologically advanced companies of their sector as customers, Devtron is redefining the paradigm of how DevOps should be done. It's flagship platform - Release Orchestration and Application Lifecycle Management on Kubernetes - is Open source and has helped companies around the world reduce their go to market time in a secure, stable and cost effective manner. It's built on some of the most loved technologies like GoLang, React, Kubernetes, TypeScript to name a few.

Website : <http://devtron.ai>

- Knowledge in any automation testing framework
- Good in any Object Oriented programming language
- Should know basics of mysql, linux, client-server architecture

Job Description

- Perform QA activities for automation testing - execute, maintain & enhance the existing/new automation test suite
- Review product requirements for testability, highlighting and proposing design considerations that will make a feature easier to test via automation, while expanding coverage
- Evangelize automation and assist other QA team members through mentorship, tutorials, and writing scripts to reduce manual testing efforts
- Develop/execute manual tests on application as well as web services. Install and configure software products on various platforms as needed.
- Take ownership for performing software testing of a given project for functional & nonfunctional requirements.
- Report software defects and track quality assurance metrics such as defect counts, test coverage
- Communicate status effectively to team
- Develop detailed test cases from functional requirements, technical specifications, and

application behavior/constraints.

- Participate in Scrum with activities such as assisting developers, perform test case reviews, research spikes, contribute in improving testing standards supporting continuous improvement, etc.
- Mentor juniors/other team members for technical or functional queries
- Showcase leadership skills & ability to handle crisis situations

Education:

- Bachelors (preferably BE/B. Tech.) - Computer Science/IT

Benefits:

- **Hybrid Work Environment:** Our team is spread across 2 locations and we're a Hybrid workforce. We have office spaces in Bangalore and Pune.
- **Yearly offsites:** Regular off-sites to meet your team members and colleagues for fun and work - with at-least one annual full company gathering! (Pandemic permitting :P)
- **Flexible timings & PTO:** Pick work hours that suit you the best! Ensure that you have effective overlaps with your team members as required, and choose the time and place of work that brings out the best in you.
- **Health Insurance:** Health Insurance for Employees and Family.
