

Job Description: Frontend Developer

Kalgudi Digital Pvt Ltd. is seeking a few talented and experienced Frontend Developers with 0-2 years of industry experience to join our dynamic team. As a Frontend lead developer, you will play a key role in designing, developing, and maintaining user interfaces for our web applications. Your expertise in Angular, Progressive Web Apps (PWA), JavaScript, TypeScript, and other frontend technologies will be critical in delivering high-quality, responsive, and interactive user experiences.

Job Responsibilities:

- Design and develop mobile and web applications using Angular Framework markup languages like HTML5, CSS
- Good understanding in working on Javascript and Typescript languages
- Collaborate with back-end developers and consuming the REST APIs
- Awareness of cross-browser compatibility issues and client-side performance considerations.
- Good understanding in PWA development
- Solid Knowledge on Software Development Lifecycle.
- Maintaining and improving website
- Create quality mockups and prototypes
- Ensure high quality graphic standards and brand consistency
- Stay up-to-date on emerging technologies
- Knowledge on GIT branching workflow and conflict resolution is expected.
- Good understanding on Agile Software methodologies for development.
- Good working experience in writing unit, integration and end to end tests
- Object Oriented analysis and design using common design patterns

Job Requirements:

- Bachelor's degree in Computer Science, Software Engineering, or a related field.
- 0-2 years of professional experience as a Frontend Developer, with a strong focus on Angular development.
- Solid understanding of frontend technologies, including HTML5, CSS3, JavaScript, and TypeScript.
- Self motivated and quick learner.
- Problem Solving Skills and self learning capability with minimal guidance

- Being a good team player
