

Company Overview

Increasing production costs, reduced operational margins, limited scope for expansion or diversification as well as unavailability of skilled manpower are hampering the growth of industries across the globe. Automation provides an opportunity to enhance the quality, precision, productivity as well as cost-effectiveness of industries. The need of the hour is to choose the right technology that enables the seamless transition of business infrastructure and ensures the achievement of maximum ROI for the technology investment.

Axis Global Automation Group of Companies is India's leading Industrial Automation and Robotics Technology Company. We are the industry channel partner for Yaskawa Robotics in India. We specialize in automating automotive industries, manufacturing and process industries, food & beverage industries, oil & gas, chemical, biotechnology and pharmaceutical industries. We are currently operating in India, Sri Lanka and Middle East.

Axis Global Automation today is a multi-faceted business group with interests in several business domains including:

1. Industrial Automation & Robotics System Integration
2. New Product Development (Special Purpose Machines, Customized Robotic Solutions, etc.)
3. Technical Training
