

Telaverge Communications: We Bring Innovation To Life

Accelerating value creation for OEM's, Operators & Enterprise Vendors (4G, 5G, Probe, ML and Zero Touch Automation)

Telaverge is a global provider of communications and technology solutions. The company has more than 250+ Strong Engineering force based out of Dallas, Texas with the India Development Centre in Bangalore. We are currently growing in terms of size and revenue as we have accelerated value creation for Telecom vendors and Operators. This is due to our consistent proven expertise in the Design, Development, and Deployment of Telecom Products and Solutions for Operators worldwide. Our deep protocol knowledge, domain expertise combined with Engineering execution and delivery skills are enabling us to deliver world-class products, custom solutions, and services.

As a part of our recruitment drive, we are **looking for Final year engineering students who are ready to join as a Fulltime R&D Engineers after internship.** We are looking for individuals who are self-motivated, organized, and who are interested in working within a group with global influence.

We assure you that your compensation will be aligned with the best in the industry. More importantly, you will get to work with some of the great minds and teams in the industry. The collective team knowledge and expertise will catalyze your career path and will put you on a fast track.

Employment Type: Internship followed by PPO (Full time employment).
Payroll: On roll

Key Responsibilities:

- **Software Development:** Work closely with the development team to design, develop, test, and debug software solutions. Contribute to the creation of high-quality code following best practices and coding standards.
- **Problem Solving:** Analyze technical problems and propose creative solutions. Debug and troubleshoot software issues and assist in finding root causes.
- **Collaboration:** Collaborate with cross-functional teams, including product managers, designers, and quality assurance engineers to develop software solutions that meet business requirements.
- **Documentation:** Create and maintain clear and comprehensive documentation for code, APIs, and project-related information.
- **Testing:** Assist in the creation and execution of test cases to ensure the quality and reliability of software applications.
- **Research and Learning:** Stay up-to-date with emerging technologies, programming languages, and industry trends. Continuously expand your knowledge and skill set.
- **Code Review:** Participate in code reviews to provide feedback on code quality and ensure compliance with coding standards.
